

# Covariate Verification: Crime

Exoneree Project

Alejandro Hernandez

2024-07-16

## Distribution Table

### Race

Create a table of sample sizes between groups of race and crime

## 7 observations missing 'Race' have been removed. To include these observations, use 'forcats::fct\_na'.

## Distribution Graphs

First, we want to verify that, when interested in time spent wrongly imprisoned, the categories of Sex, Race, and Age are distinct groups. As we do so, we will describe how the distribution of time spent wrongly imprisoned for one group compares to its counterpart(s).

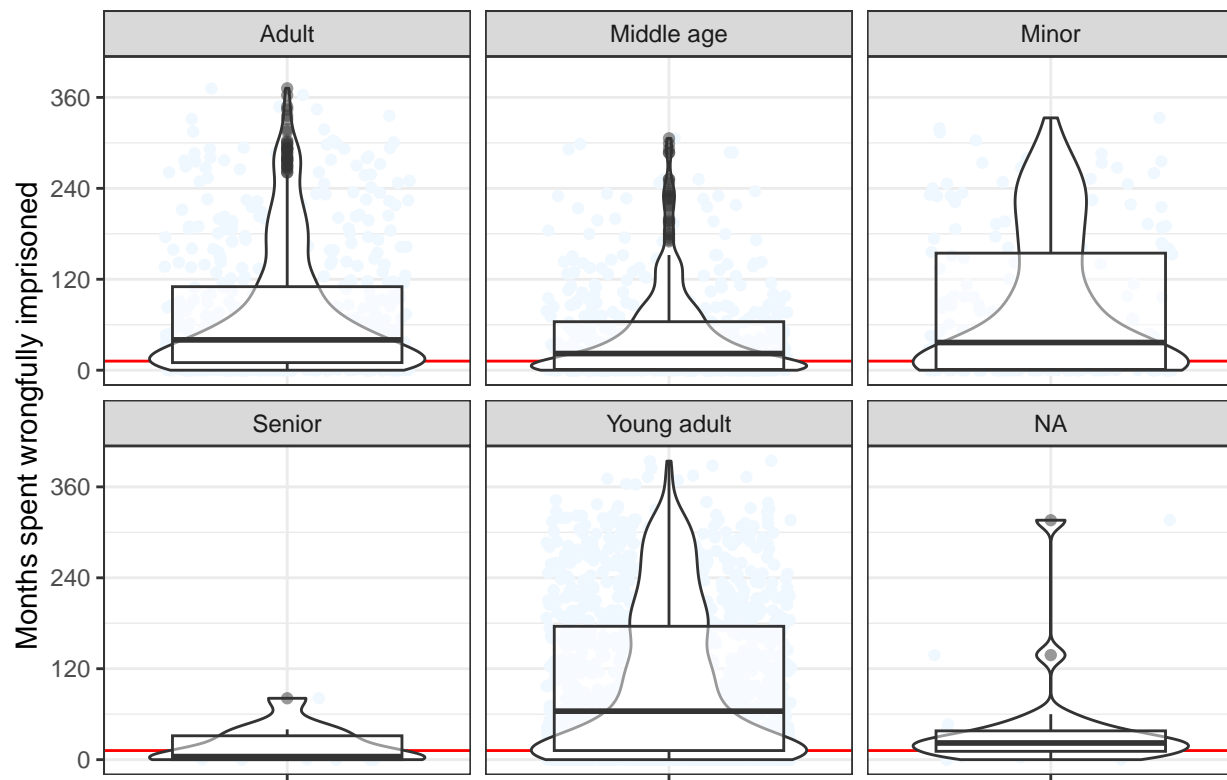

Note that time is measured here in months.

```
##      ID Last.Name First.Name  Race  Sex    State County    Worst.Crime.Display
## 1 1108   Gayles   Anthony Black Male Illinois   Cook Drug Possession or Sale
##      Crime.Category              Sentence F.MFE FC  ILD P.FA DNA MWID OM CV IO SA CIU
## 1      Misdemeanor 1 year and 6 months      0 0  0   1  0   0 1 0 1 0 1
